

CANADIAN FIELD TRIP

VIRTUAL FLIGHT. REAL AMAZEMENT.

Grades 3 - 5

WHERE ARE YOU HEADED?

Canada is the second largest country in the world with many exciting locations to visit. Your goal will be to create an itinerary for a class field trip to four sites chosen from the scenes of FlyOver Canada.

In groups, choose four of the locations for a class of 30 students to visit. Before you can start your journey across the country, you will need to research each location, determine an itinerary, and put together a proposal that you can present to the class. The sky is the limit with this project so use your imagination when you are researching.

ROUTE

On the map below, mark the four destinations with a star that you have chosen for your field trip and show the direction from getting from one point to the next.

TRAVEL

Next you will be deciding how to travel, as a class of 30, to all four destinations. Include how you will be traveling and how much that method of travel will cost per person.

	Method of Travel	Cost per person	Cost of 30 people
School to your first location			
First location to second location			
Second location to third location			
Third location to fourth location			
Fourth location back to school

PRESENTATION

Create a presentation of your findings. Include all the locations in addition to your favourite option for outings, restaurants, and accommodation from each. Additionally, ensure you have a budget laid out with a cost outlined for each option and total cost overall. When you create your presentation, ensure to show the information in a visually pleasing way.
